Allow Page Breaks within Content in Designer forms

Alex Adams, aladams@fdic.gov

Follow these steps to Allow Page Breaks within Content.

- 1. Open the form in Designer. Note: The subform and field names in this PDF are specific to the FDIC form. Your subform and field names will be different.
- 2. Expand the hierarchy so you can see the Q6 subform located here.

form1.Page1.Section2-P2.Q6

3. Select the Q6 subform and open the Subform tab of the Object palette (see illustration).
